EZL-75 Thermal Label Printer

Hot Keys Let You Access More than 150 Common Security, Location and Voice/Data/Video Terms with the Touch of a Button!

If your labeling needs don't quite justify all the high-end features of T&B's EZL-100, now there's a lower cost solution for simple labeling. The EZL-75 thermal label printer is just as easy to use as the EZL-100. Simply type and print. Or don't even bother typing. Instead, use hot keys to choose among the EZL-75's built-in library of symbols and more than 150 commonly used words for security, location and voice/data/video labeling. The EZL-75 supports up to 2 lines per label and can print up to 50 copies of a single label.

Typical Labeling Applications:

- Audiovisual
- Security
- Datacom
- General/light commercial

- Hot keys provide one-touch flagging for wires and cables and fixed-length labels for faceplates and security panels
- Incremental alpha and numeric printing makes printing distribution panel labels fast and simple
- 13-character backlit display enhances readability
- Durable bumper safeguards against damage in the tool box
- Uses the same label cassettes (up to 1/2" width) as EZL-100
- Prints high-quality labels that stick and last — available in permanent polyester, flexible nylon and heat-shrink tape
